Other Ingredients: Nettle root extract, polygonum cuspidatum, white button mushroom extract, grapefruit extract, palmitic acid, steric acid, linoleic acid, g-linoleic acid, dihomog-linoleic acid, myristic acid, arachidic acid, behenic acid, lignoceric acid, gelatin, glycerine, water, caramel color, carob, titanium dioxide, stearic acid, magnesium stearate, FD&C Blue #1 and FD&C Red #40.

Recommended Use: Take one pack daily with food. On training days take one pack along with the meal prior to your workout. Animal Test works ideally when in conjunction with intense training and an increase in quality calories and protein. Also, be sure to prioritize proper hydration during an Animal Test cycle. For best results use for two consecutive cycles—a total of 42 days. Afterwards take 4 weeks off. During this off time, Animal M-Stak is recommended to preserve lean mass gains. For additional stacking suggestions please visit www.animalpak.com for more information.
